Charging Guidelines:

The proper management of the charging of the carts will protect the batteries from being damaged.

1.   Employees managing the cart should as much as possible avoid leaving the computers to charge overnight. This will cause battery burning and will rapidly decrease the life of the battery.

2.   The laptops should be charged when the battery reaches 30%.

3.   The laptops can be configured to show the time remaining when in use and the amount of time it will take to be fully charged.

4. Students shall not charge laptops. Any laptops needing charge shall be returned to the Library Reserve Desk.
